SUMMARY

Experienced Senior Level Software Engineer with expertise in ASP.NET, C#, and DevOps. Developed and maintained web applications for prior authorizations, appeals submission, and fraud reporting, automated X12 and FHIR API validation, and optimized Oracle and T-SQL databases. Led junior developers in coding standards, debugging, and database optimization, and participated in hiring processes for various development roles.

EXPERIENCE

Software Engineer III

University of Utah Health Plans

April 2020 - Current, SLC, UT

- Created and maintained internal and external facing web applications to help facilitate users obtain prior authorizations, submit appeals, organize sanction information, and Fraud Waste and Abuse reporting.
- Executed DevOps responsibilities including enhancing server performance, managing certificates, and deploying code efficiently.
- Automated process to validate X12 documents, i.e. 834 and 837 files as well as validate and maintain FHIR API, utilizing R4 and R5 standards.
- Created and optimized many database scripts for Oracle and T-SQL databases.
- Guided junior developers on implementing coding standards, debugging techniques, and database optimization.
- Conducted interviews for senior and junior developer roles.

Senior Software Engineer

ArbiterSports.Com

November 2017 - March 2020, Sandy, UT

- Played a major role in the planning, research, and selection of new technology for future applications and enhancements including Unit Testing templates using xUnit, .NET Core, and React.
- Mentored junior developers on best practices, coding standards, debugging, and database optimization.
- Integrated Avatax sales tax platform on website and NetSuite accounting software.
- Defined business requirements and technical specifications with product managers.
- Acquired proficiency in various reporting processes including Windward, ActiveReports, and OfficeOpenXML to develop, optimize, and enhance the visual appeal and efficiency of reports.
- Interviewed candidates for senior and junior developer positions.

Software Analyst/Developer

Staywell LLC

July 2014 - October 2017, Salt Lake City, UT

- Maintained, enhanced and stabilized previously outsourced web application.
- Improved metric reporting process by leveraging stored procedure and code optimization from several hours to 15 seconds.
- Utilized Visual Studio for development projects involving ASP.NET C# MVC, JavaScript, JQuery, Knockout, CSS, and requireJS.
- Used MongoDB, Oracle 11g and MS SQL databases.
- Trained on AngularJS and NodeJS for possible migration.

Senior Software Engineer II

Monavie Inc

February 2011 - July 2014, South Jordan, UT

- Instrumental in the maintenance and enhancement of internal and client facing websites.
- Engaged with project managers, business analysts, and technical analysts to align with business requirements and technical specifications, ensuring punctual project delivery.
- Wrote technical specifications for developers from business requirements, including time estimations.
- Conducted peer code reviews and unit testing to ensure high quality code.

Lead Developer

Xennsoft Corp

June 2007 - February 2011, South Jordan, Utah

- Led team of over 20 developers supporting multiple external clients.
 - Administered all code base management using tortoise SVN during simultaneous short and long development cycles.
 - Facilitated the creation of code standards and enforcement process.
 - Integral in the planning of application architecture and facilitated implementation.
 - Scheduled and facilitated team meetings for training and project post mortems.
-
